

ROCKET ESPRESSO

# FAUSTO & SUPER FAUSTO

Introducing the new FAUSTO and SUPER FAUSTO grinders by Rocket Espresso.

SUPER FAUSTO, big brother to FAUSTO, is a new addition to the Rocket Espresso grinder range designed for commercial settings, in cafes and restaurants where speed and effortless performance are essential.

Equipped with commercial quality 75mm flat burrs, for higher grinding productivities of 4-5 grams/second. Long durability is guaranteed with a special Red Speed coating (superior to titanium) applied to the burrs, grinding in excess of 2,000-2,500 kg of coffee before showing signs of wear.

A newly developed 2.8" digital touch screen with shot counter and three programmable portion buttons allows for quick adjustments and effortless portion control. And with close to silent operation, SUPER FAUSTO is ideal for noise sensitive environments.

FAUSTO takes all the great features and ease of use from the previous FAUSTO, but with an improved digital touch screen interface (taken from SUPER FAUSTO) and is quieter during operation.

Both SUPER FAUSTO and FAUSTO are available in matte black or polished silver finishes and can be ordered now.
