APPARTAMENTO

Temperature Control Adjustment **TCA**

Is the evolution of our iconic Appartamento espresso machine with a modern aesthetic and features that take the Appartamento up a gear.

The newly developed machine functions and improvements deliver an even better coffee experience in the home, raising the benchmark for performance in this category of premium domestic espresso machines.

MAIN FEATURES

System with heat exchanger

Wider drip tray

Boiler capacity: 1.8 litres

New porta filter

Boiler covering for energy saving

Dimensions 270W × 448D × 358H mm

Vibration pump

Weight: 22 Kg

Water tank capacity: 2.5 litres

Installed power: 1350 W

Tank reserve sensor

NEW DESIGN

Rounded sides: They have given a whole new aesthetic to this perspective of the machine. The smooth curves draw the eye in, and a new vertical orientation for the Rocket logo

Focus on the holes: The distinctive circles on the machine sides have been accentuated with a debossing treatment, giving them a three-dimensional quality

The brewing group: A dynamic, purposeful shape, with a distinctive look.

The purposeful design conveys strength, reliability and precision: these three features are the very essence of the Appartamento TCA model

A small “**Easter egg**” tucked away in the cup warmer area: we’ll be delighted to see who manages to find it!

NEW TECHNOLOGY

There's much more to the new Appartamento TCA by Rocket than design, however. Developments in electronics have allowed us to introduce a new series of features and functions that guarantee an outstanding cup of coffee.

- **Stand-by** (energy saving) function
(OFF or after 30 minutes, default 30 minutes)
- **Boiler pressure** adjustment
(from 0.9 to 1.2 bar in 0.1 bar increments, default 1 bar)
