

ROCKET ESPRESSO PRESENTS

# APPARTAMENTO TCA

Rocket Espresso proudly introduces the all new Appartamento TCA; the next generation of Appartamento with Temperature Control Adjustment.

The Appartamento TCA is the evolution of our iconic Appartamento espresso machine with a modern aesthetic and features that take the Appartamento up a gear. The newly developed machine functions and improvements deliver an even better coffee experience in the home, raising the benchmark for performance in this category of premium domestic espresso machine.

Available for shipment from July 2023.

The Appartamento TCA was designed by Valerio Cometti, whose brief was to preserve the original Appartamento's distinctive aesthetic, whilst also seeking to evolve the design for today's barista.

A smoother contour and sensual feel has been brought to the almost "Bauhaus" architecture of the original machine which increases the desire to touch and interact with the "new" Appartamento TCA.

Aesthetically the new Appartamento has been softened to enhance the relationship between the machine and the barista, through the introduction of two new design elements.

The rounded sides that envelop the back of the machine, and the distinctive circles on the machine sides have been accentuated with a debossing treatment, giving them a three-dimensional quality.

The purposeful design of the new brewing group conveys strength, reliability and precision. These three qualities are the very essence of the Appartamento TCA.

The classic Rocket taps have been refined and the sleeker shapes contrast the powerful steam and water dispensing performance of the new machine.

## MAIN FEATURES

- Heat exchanger system
- Boiler capacity: 1.8 litres
- Boiler covering for energy saving
- Vibration pump
- Water tank capacity: 2.5 litres
- Tank reserve sensor
- Wider drip tray
- New porta filter
- Dimensions (W x D x H): 270 x 448 x 358mm
- Weight: 22kg
- Installed power: 1350W
